

1. C:\Users\Win7\Documents\2013-Sales.xlsx
2. Removable storage media
3. 3/2/2014 5:00
4. Removable storage media
5. 3/2/2014 18:50
6. B4A2B40D
7. Microsoft 2007
8. C:\Users\Win7\Documents\Personal.docx
9. With evidence from the LNK files, it would refute this claim. Based off the information of the LNK files, it showed that the 2013-Sales.xlsx was accessed on 03/02/2014 at 5:00 since the suspect claims that they were deleted on 02/20/2014.
10. With evidence from the LNK files, the suspect's argument would be refuted due to daves-list came from an E: drive which can be interpreted as a removable storage device. This can also be assumed for the Profts.Graph.png.
11. LNK files are very helpful in forensic investigation due to information in regards to creation date, last modified, and accessed time. It also shows the path of the files, the device, and serial number.

#### Analyzing Recycle Bin

12. 03/02/2014 18:51
13. 03/02/2014 18:51
14. C:\Users\Win7\Documents\Clients.xlsx
15. 402107
16. \$R2013-Sa.xlsx
17. 2
18. Analyzing the recycle bin is helpful in a forensic investigation because you get to analyze files that were meant to be deleted. You can access information in regards of when it was deleted, name of the file, path, size and operating system.
